***Allowable Subject Matter***

1. Claims 1 – 26 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant's invention is drawn to a method for detecting and decoding multiple signals which occupy overlapping bandwidth and overlapping time resources. Applicant's independent claim 1 recites, *inter alia*, a method for processing a multi-user signal with a structure as defined in the specification (Pages 11 – 17) including (c) deriving a soft signal for a first user by subtracting, if available, weighted representations of other user signals from the detected user signal of said first user; (d) calculating a posteriori probabilities for each symbol comprising the soft signal; (e) refining said probabilities utilizing the transmission channel estimate for the first user in an iterative decoding algorithm, wherein a probability is either partially or fully decoded depending on application of decoder convergence criteria; and returning to (a), (b) or (c) with the refined probabilities forming part of the weighted representations to be subtracted from detected user signals of the users. Applicant's independent claim 61 comprises a particular combination of elements, which is neither taught nor suggested by the prior art. Accordingly, applicant's claims are allowed for these reasons and for the reasons recited by applicant in the amendment filed on 3/13/2008.

Regarding claim 14, the claim is interpreted and allowed for the same reason as set forth in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2617

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
